

Judging Guidelines

Category	Criteria
Purpose	Video explains a current application of genetics which is realistic and not science fiction.
Content Accuracy	All scientific information presented is accurate and complete.
Style/Creativity	Video is creative, imaginative, and/or innovative. The video effectively uses unique methods to express the message and engage the viewer.
Original Footage	Nearly all of the video footage is derived from the student team's own original work, and any non-student material is only used to enhance or strengthen the message of the student footage.
Video Quality	Video is clear and does not shake. Sound quality is appropriate; voices can be heard. Editing enhances the video. Music, images, etc. are credited properly. Video is good quality and plays properly without errors.
